Jakkeermene har ytre mansjetter, som skal dekke til mansjetten på hansken

Jakkens indre erme har en løkke for tommelen.
Dette for å sikre at den indre erme følger med ned i hansken.

Jakkens ytre mansjett skal dekke over mansjetten på hansken .

Jakken har en borrelås i halsen som skal lukkes.

Dobbelt frontlukking, hvor alle klapper må kneppes for å hindre at gnist kommer inn.

Viktig

- Hvis bekledningen utsettes for store mengder smeltet metall, så skal man øyeblikkelig forlate risikoområdet, ta av bekledningen og inspisere bekledningen slik at man er sikker på at den ikke har blitt påført varige skader.
- Det er viktig at man velger riktig størrelse, slik at man får en god overlapp med buksen
- Vi anbefaler at det benyttes flammehemmende underbekledning.

Vaskeinstruks

- Vaskes på 30 grader med like deler Oldopal Basic (vaskemiddel) og Lival Licker konz (skinnfett).
- Etter vask gis en kort tromling på 30 grader, og plagget henges til tørk.
- Når plagget er helt tørt, tromles en gang til for mykgjøring.

The jacket sleeves have outer cuffs designed to cover the glove cuffs

The jacket's inner sleeve has a thumb loop to ensure the inner sleeve stays tucked into the glove.

The jacket's outer cuff is designed to cover the glove cuff.

The jacket has a Velcro closure at the neck that should be fastened.

Double front closure, with all flaps fastened to prevent sparks from entering

Important

- If the clothing is exposed to large amounts of molten metal, you must immediately leave the hazard area, remove the clothing, and inspect it to ensure it has not sustained permanent damage.
- It is important to choose the correct size to ensure a good overlap with the trousers.
- We recommend wearing flame-resistant undergarments

Washing instructions

- Wash at 30°C with equal parts Oldopal Basic (detergent) and Lival Licker Konz (leather fat).
- After washing, tumble briefly at 30°C, then hang the garment to dry.
- Once the garment is completely dry, tumble once more to soften it
